

CONTENTS

Preface	v
List of Contributions	ix
1 From Microstructures to Nanostructures <i>Faiz Rahman</i>	1
Nanoscale Materials and Structures for Electronics	
2 Assembling Ferromagnetic Single-electron Transistors with Atomic Force Microscopy <i>Hakån Pettersson, Ruisheng Liu, Dmitry Suyatin and Lars Samuelson</i>	29
3 Nanoporous Alumina Templates for Nanowire Electron Devices <i>Travis L. Wade, Costel S. Cojocaru, Jean-Eric Wegrowe and Didier Pribat</i>	41
4 Single-walled Carbon Nanotube Transistors <i>Sunkook Kim and Saeed Mohammadi</i>	63
5 Cooling with Integrated Carbon Nanotube Films <i>Géza Tóth, Krisztián Kordás, Pulickel M. Ajayan and Robert Vajtai</i>	83
6 AC Dielectrophoresis Alignment of Gallium Nitride Nanowires (GaN NWs) for Use in Device Applications <i>Sang-Kwon Lee, Tae-Hong Kim and Seung-Yong Lee</i>	97
7 Design, Fabrication, and Applications of Large-area Well-ordered Dense-array Three-dimensional Nanostructures <i>Chang-Hwan Choi and Chang-Jin “CJ” Kim</i>	113

8	UV-NIL Stamp Fabrication Techniques with Diamond-like Carbon Film	131
	<i>Jun-ho Jeong, Ali Ozhan Altun and Ki-don Kim</i>	
9	ZnO Nanowires and Nanobelts: Structure Switch by Indium Doping	155
	<i>Hong Jin Fan</i>	
10	Field Emission Properties of 1-D SiC Nanostructures	179
	<i>Guozhen Shen and Di Chen</i>	

Nanoscale Materials and Structures for Photonics

11	Manipulating the Optical Properties of Individual and Arrays of Gold Nanopyramids	193
	<i>Jeunghoon Lee, Joel Henzie and Teri W. Odom</i>	
12	Properties of Gold Nanoantennas in the Infrared	209
	<i>F. Neubrech, J. Aizpurua, S. Karim, T. W. Cornelius, and A. Pucci</i>	
13	Three-dimensional Holographic Polymeric Photonic Crystal Operating in the Optical Communication Window	223
	<i>Jiaqi Chen and Ray T. Chen</i>	
14	Continuous Roll Nano-imprinting Technology for Large-scale Nano- and Microstructures	237
	<i>Shinill Kang, Suho Ann and Seok-min Kim</i>	
15	Fabrication and Characterization of Two-dimensional ZnO Photonic Nanostructures	251
	<i>Jingbiao Cui</i>	
16	Visible Light Emission from Innate Silicon Nanoparticles in Silicon-compound Films Grown at Low Temperatures	267
	<i>Cao Zexian</i>	
	Index	295
