Index

actuator (linear) 2,4,5
adaptive 26
admittance control 62
airway training system 180,181,184
assessment of surgical skills 175
assistance 3,10,18,20–23,26
augmented Feedback 1,6

Bio-inspired 197
Biomechatronic 1,2,4,6,7
brain-Computer interface 136
cadence control 101
capsule endoscope 1,6
clinical assessment 10
co-contraction 65,72
co contraction index 116,117,119,121
continuous EMG-driven motion (cEMG) 84
continuous passive motion (CPM) 61
decision tree to predict gait independence 35
degree of freedom (Dof) 35
EMG-triggered motion (EMG-TRIG) 84
electrical stimulation 1,5,6
electrodes 93,96,97
electromyography (EMG) 5
evaluation 4,6
exoskeleton robot 5
FES-induced leg cycling 93
evoked training 94,98
evoked exercise 98,99,103
contractions 97
robot 1,101,121,141,151,180
finger forces 45,51,52
flexor synergy 134
functional capacity 94,98

functional electrical stimulation (FES) 6
fuzzy control 127
gait reconstruction 31,37,40,41
grip force 78
hand CARE 52
hand function 6
hapticKnob 45,47,48,50,51,53–56
Hills equation 159
hip knee ankle foot orthosis (HKAFO) 32
hip guidance orthosis (HGO) 32
impedance control 13
intention-driven 1,6
interactive 5,6
isokinetic exercise 101,102
isokinetic FES leg stepping trainer (iFES-LST) 102
isokinetic functional electrical stimulation leg cycle ergometer (iFES-LCE) 100
joints,
metacarpal phalangeal (MCP) joint 79
interphalangeal (PIP) joint 79
lateral system 33,35
limitation of the orthoses 37
locomotion mechanism 188,195,196,197
MR fluid 157,158,161,162
Magnetic actuation 199,201
magnetorheological 6
maximum voluntary contraction (MVC) 83,84,86,87
medial system 33,34,40
medical robotic training systems 174
motor learning 26
motorized cycle ergometers 100
multimodal feedback 171,174,184
muscle stimulation 95–97,101
neuromusculoskeletal system 2
normalization 82,83
orthoses 31,33,35,37
paraplegia 5
performance measure 25
planar robot 126,128,135,136,138
pneumatic muscle actuators (PMA) 15,16
post-stroke 49,51,53,54,55
prime walk 33–35,39,40,41
quality of life (QOL) 78
Range of motion (ROM) 37
reciprocating gait or thosis (RGO) 32
recovery 3–5
rehabilitation therapy 9–11
rehabilitation training 3,6
rehabilitation robot 1,3
resistive torque 66,69
restoration of gait 31
robot-assisted rehabilitation 7
robotic device 3
robotic engineering for reconstruction of paraplegic gait 40
robotics 2
root-mean-squared-error (RMSE) 67
signals, extensor digitorum (ED) 83
Abductor pollicis brevis (APB) 83
spasticity 20
spinal cord injuries (SCIs) 31
spinal cord injury (SCI) rehabilitation 93
stimulation artifact 113,114
strain gauges 81
stroke 1–4
stroke rehabilitation 1,4,5
suture/ligature training system 176
task training 79
torque 5
tracking 64–67
training effects 63,66,68,73
upper extremities 35,37,40,41
virtual reality 11,23,24,26
walkabout 33
walking abilities 34
wearable power-assist locomotor (WPAL) 31,37
wearable robot 5
wireless power transmission 199
wrist 1
