- unpolarized light 44, 56–60, 179
- Urania*-type 174, 176, 178
  
- vacuum 21, 24, 30–32, 111, 121–22, 128, 145, 152, 265, 282, 286, 324, 326, 382, 414
- vision 13, 60, 62, 66, 67, 71–73, 77, 86–87, 117, 185–86, 197–98
- visual cells 64–71
  
- wave nature of light 5, 17–18, 322
- wavelength, scaling of 445, 447
- wavelength dependence 144–45, 168, 372, 381
- wavelength-scaled reflection spectrum 426
  
- waves
  - propagating 410–11, 425, 433–34, 471
  - radio 19
  - reflected 39–40, 96, 432
  - superposed 92–93, 103
- weevil 11, 15, 318
- white light 76, 176, 183, 190, 193, 338, 388–89, 396
  
- XYZ color system 74, 76–81
  
- Young's interference experiment 95, 97, 109, 232
  
- zeroth-order grating 235–37
- zone boundary 261, 270–71, 274–75, 279, 289, 291, 293–94, 319
