# Contents

<b>Introduction</b>	<b>1</b>
<b>PART I LOGICAL SPACES</b>	
<b>1 Structural Description</b>	<b>7</b>
1.1 One-Dimensional Space	7
1.2 Two-Dimensional Space	10
1.3 Three-Dimensional Space	23
<b>PART II "CLOSED" INFERENCES</b>	
<b>2 Product Inferences</b>	<b>65</b>
2.1 Introduction	65
2.2 Derivation of Classical Inferences through Products	76
2.3 Extension of Classical Inferences through Products	92
2.4 Derivation of the Inferences of the First Mixed Mode through Products	107
2.5 Derivation of the Inferences of the Second Mixed Mode through Products	117
<b>3 Sums</b>	<b>129</b>
3.1 Introduction	129
3.2 Classical Inferences through Sums	137
3.3 Extension of Classical Derivation through Sums	147
3.4 First Mixed Mode through Sums	155
3.5 Second Mixed Mode through Sums	163
<b>4 Subtractions</b>	<b>173</b>
4.1 Introduction	173

4.2	Classical Inferences through Subtractions	175
4.3	Extension of Classical Inferences through Subtraction	185
4.4	First Mixed Mode through Subtractions	193
4.5	Second Mixed Mode through Subtractions	201
<b>5</b>	<b>Divisions</b>	<b>211</b>
5.1	Introduction	211
5.2	Classical Derivations through Divisions	215
5.3	Extension of Classical Derivations through Divisions	225
5.4	Inferences of the First Mixed Mode through Divisions	233
5.5	Inferences of the Second Mixed Mode through Divisions	241
<b>PART III GENERALIZATIONS AND APPLICATIONS</b>		
<b>6</b>	<b>Assessment of All the Previous Inferences</b>	<b>253</b>
6.1	General Considerations	253
6.2	Product Inferences	262
6.3	Sum Inferences	265
6.4	Subtraction Inferences	267
6.5	Division Inferences	269
6.6	Simplified Summary of the Previous Inferences	272
<b>7</b>	<b>Generalized Representation and Structural Relations</b>	<b>277</b>
7.1	Subtractions	277
7.2	Divisions	280
7.3	Final Considerations	282
<b>8</b>	<b>Generalized Inferences</b>	<b>285</b>
8.1	The Basic Forms of the Previous and of New Inferences	285
8.2	The Most General Forms of Closed Inference	292
8.3	The Results of the All Derivations	299
8.4	Cycles of Inferences	306
8.5	Open Inferences with Two and More Variables	318
8.6	Mereological Inferences and Related Ones	326

8.7	Open Inferences in General	344
8.8	Why Three?	345
8.9	Predication and Relations	351
<b>9</b>	<b>Applications</b>	<b>359</b>
9.1	Artificial Intelligence	359
9.2	Classical Computing	360
9.3	Quantum Computing: Raising and Lowering Operators	369
9.4	A Vectorial Representation	375
<b>10</b>	<b>Conclusions</b>	<b>379</b>
	<i>Bibliography</i>	383
	<i>Author Index</i>	387
	<i>Subject Index</i>	389
